SUMMARY

Full-Stack Software Engineer with 3 years of experience building web applications, RESTful APIs, and cloud-based solutions using Java, Spring Boot, JavaScript, Angular, Node.js, Docker, and GCP. Skilled in microservices architecture, OAuth 2.0/JWT authentication, CI/CD pipelines, SQL/NoSQL databases, and Agile software development.

SKILLS

Languages: Java, JavaScript, TypeScript, C#, C++, SQL

Frontend / Backend: Angular, Node.js, Spring Boot, REST APIs, Microservices, OAuth 2.0 / JWT, HTML5, CSS3

Databases: PostgreSQL, MySQL

Cloud / DevOps: GCP, Docker, Jenkins, CI/CD, SonarCloud

Tools & Practices: Git, Postman, JUnit, Agile/Scrum, OOP

EXPERIENCE

Full-Stack Software Developer | *Freelance*

Jun 2023 – Present

- Architected and deployed full-stack web applications for 5+ clients using Angular, TypeScript, and Node.js; containerized on GCP with Docker-based CI/CD pipelines, reducing deployment cycles by 50%.
- Built secure OAuth 2.0/JWT authentication flows, reusable Angular component libraries, and RESTful API integrations that improved cross-client code reuse and reduced per-project iteration time.
- Designed responsive UIs with Angular, HTML5, and CSS3; implemented dynamic form validation and third-party API integrations to enhance usability and customer engagement.

Software Engineer | *Cognizant Technology Solutions*

Apr 2022 – Apr 2023

- Developed RESTful microservices in Java and Spring Boot handling authentication, authorization, and core business logic for enterprise applications; maintained code quality with JUnit tests and SonarCloud static analysis.
- Built and owned Jenkins CI/CD pipelines end-to-end, improving team delivery velocity by 25% and eliminating manual deployment errors; automated email notification services reduced operational workload by 40%.
- Delivered a production MVP 3 days ahead of a 4-week deadline through modular Spring Boot architecture and proactive stakeholder communication.

Software Engineer | *Revature*

Jan 2022 – Apr 2023

Enterprise-focused training program; placed at Cognizant Technology Solutions.

- Contributed to 12+ full-stack projects in Java, Spring Boot, Angular, Node.js, and PostgreSQL within Agile teams; led a team of 5 developers within a 15-person cross-functional group, improving sprint delivery efficiency by 10%.
- Implemented REST APIs, relational database schemas, and Angular frontend components across concurrent Agile sprints, consistently meeting or exceeding milestone deadlines.

PROJECTS

Neural Network — Flappy Bird AI | *Java • Neural Networks • Genetic Algorithms • OOP*

- Designed and built a feedforward neural network from scratch in Java; applied a genetic algorithm (selection, crossover, mutation) to evolve an autonomous AI agent across hundreds of generations without ML libraries.
- Engineered a custom fitness function and real-time game-state input pipeline, demonstrating applied machine learning, algorithm design, and data structures from first principles.

Restaurant Web Application | *Angular • TypeScript • Java • Spring Boot • PostgreSQL • REST APIs*

- Built a full-stack restaurant ordering platform with menu browsing, cart management, and checkout; developed a Java Spring Boot REST API backend with PostgreSQL persistence, JUnit test coverage, and Postman-validated endpoints.

Tetris — Accounts & Leaderboard | *JavaScript • HTML/CSS • SQL • Authentication*

- Engineered a browser-based Tetris game with a full SQL-backed user system: hashed credential authentication, session management, and a persistent global leaderboard ranked across difficulty levels.

Multiplayer Cooking Game (In Development) | *C# • Unity • Blender*

- Sole developer of a multiplayer cooking game inspired by Overcooked; designed and built all gameplay systems in C# and Unity while creating original 3D assets in Blender, owning the full pipeline from modeling to implementation.
- Architected an object-oriented system in C# to classify recipes, model player actions, and handle NPC routing, demonstrating clean separation of concerns and scalable game logic design; currently extending the architecture to support real-time multiplayer.

EDUCATION

Associate of Science, Computer Science | *Riverside City College — Riverside, CA*

Certificate of Achievement, C++ Programming — Riverside City College
